EXAMINER

POKRZYWA, JOSEPH R

ART UNIT	PAPER NUMBER
----------	--------------

2622

DATE MAILED: 06/06/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/053,174	Applicant(s) SIMPSON ET AL.	
	Examiner Joseph R. Pokrzywa	Art Unit 2622	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-27 is/are pending in the application.
 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-27 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 13 November 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Information Disclosure Statement

1. The reference listed in the Information Disclosure Statement submitted on 11/13/01 has been considered by the examiner (see attached PTO-1449).

Drawings

2. The drawings were received on 11/13/01. These drawings are acceptable by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. **Claims 1-27** are rejected under 35 U.S.C. 102(b) as being anticipated by Tonkin (U.S. Patent Number 6,134,568).

Regarding **claim 1**, Tonkin discloses a method comprising receiving, via at least one network service, imaging data that is to be included in a booklet (see Fig. 5A, column 6, line 64-column 7, line 27), receiving, via the at least one network service, user input for incorporating the imaging data into the booklet (see Figs. 5A-5F, column 7, line 11-column 8, line 67), and

Art Unit: 2622

building, via the at least one network service, a booklet incorporating imaging data in accordance with the user input (see Figs. 8A-9, column 12, line 23-column 13, line 24).

Regarding *claim 2*, Tonkin discloses the method discussed above in claim 1, and further teaches that prior to receiving the imaging data, causing, via at least one network service, a user interface to be presented on a client device, the user interface being configured to enable a user to select imaging data for use in making a booklet, and wherein the receiving imaging data comprises receiving user selection of the imaging data (see Figs. 5A-5F, column 7, line 11-column 8, line 67).

Regarding *claim 3*, Tonkin discloses the method discussed above in claim 2, and further teaches that receiving user selection comprises receiving user selection of multiple documents for use in building the booklet (see Fig. 5A, column 6, line 64-column 7, line 27).

Regarding *claim 4*, Tonkin discloses the method discussed above in claim 2, and further teaches that the receiving user selection comprises receiving user selection of multiple documents for use in building the booklet, the multiple documents being retrievable from a user-associated (see Fig. 5A, column 6, line 64-column 7, line 27), network accessible personal imaging repository and further comprising prior to the building, retrieving, via the at least one network service, the multiple documents from the personal imaging repository (see Figs. 5A-5F, and 8A-9, column 7, line 11-column 8, line 67, and column 12, line 23-column 13, line 24).

Regarding *claim 5*, Tonkin discloses the method discussed above in claim 2, and further teaches that the acts of causing, receiving user selection, and receiving user input are respectively performed by multiple network services (column 7, line 11-column 8, line 67).

Regarding **claim 6**, Tonkin discloses the method discussed above in claim 1, and further teaches that the at least one network service is implemented, at least in part, by at least one printer (document production locations 71-73, see Fig. 1, column 8, line 10-column 10, line 62).

Regarding **claim 7**, Tonkin discloses the method discussed above in claim 1, and further teaches that at least one network service is implemented, at least in part, by at least one proxy server that serves as a proxy for at least one printer (document production locations 71-73, see Fig. 1, column 8, line 10-column 10, line 62).

Regarding **claim 8**, Tonkin discloses the method discussed above in claim 1, and further teaches of saving the booklet, via the at least one network service, in a personal imaging repository associated with the user (column 4, line 63-column 5, line 6, and column 8, lines 61-67, as seen in Figs. 5A-5F, wherein the filename is “Robert Tonkin/...”, and in Figs. 8A-8E, wherein the filename is “Tree Branch/Eric Cartman”).

Regarding **claim 9**, Tonkin discloses the method discussed above in claim 1, and further teaches of printing the booklet, via the at least one network service, on a network-accessible printer (document production locations 71-73, see Fig. 1, column 8, line 10-column 10, line 62).

Regarding **claim 10**, Tonkin discloses one or more computer-readable media having stored thereon computer-readable instructions which, when executed by one or more processors (column 5, lines 39-52), cause the processors to send content to a client device for execution by a client browser (column 5, line 53-column 6, line 50), the content enabling the client device to display a user interface that is configured to enable a user to select imaging data for use in building a booklet (see Figs. 5A-5F, column 7, line 11-column 8, line 67), provide, over a network, a user selection of imaging data for use in building the booklet (see Fig. 5A, column 6,

Art Unit: 2622

line 64-column 7, line 27), provide, over the network, user input for incorporating the imaging data into the booklet (see Figs. 5A-5F, column 7, line 11-column 8, line 67).

Regarding *claim 11*, Tonkin discloses the computer-readable media discussed above in claim 10, and further teaches that the instructions further cause the one or more processors to save, via the network, a booklet that has been built based on the user's input (column 7, line 11-column 8, line 67).

Regarding *claim 12*, Tonkin discloses the computer-readable media discussed above in claim 10, and further teaches that the instructions further cause the one or more processors to print, via the network, the booklet on one or more accessible printers (document production locations 71-73, see Fig. 1, column 8, line 10-column 10, line 62).

Regarding *claim 13*, Tonkin discloses the computer-readable media discussed above in claim 10, and further teaches that the instructions further cause the one or more processors to provide the user selection and the user input over a network comprising the Internet (column 3, line 41-column 4, line 24).

Regarding *claim 14*, Tonkin discloses a method comprising causing, via at least one Web service, a user interface to be presented on a client device, the user interface being configured to enable a user to select imaging data for use in making a booklet (see Figs. 5A-5F, column 7, line 11-column 8, line 67), receiving, via at least one Web service, a user selection of imaging data (see Fig. 5A, column 6, line 64-column 7, line 27), receiving, via the at least one Web service, user input for incorporating the imaging data into the booklet (see Figs. 5A-5F, column 7, line 11-column 8, line 67), building, via the at least one Web service, a booklet incorporating imaging data received from the user input (see Figs. 8A-9, column 12, line 23-column 13, line

Art Unit: 2622

24), and printing, via the at least one Web service, the booklet on a Web-accessible printer (document production locations 71-73, see Fig. 1, column 8, line 10-column 10, line 62).

Regarding *claim 15*, Tonkin discloses the method discussed above in claim 14, and further teaches of saving the booklet, via the at least one Web service, in a Web-accessible location (column 9, line 5-column 10, line 62).

Regarding *claim 16*, Tonkin discloses the method discussed above in claim 14, and further teaches that the at least one Web service is implemented, at least in part, by at least one printer (document production locations 71-73, see Fig. 1, column 8, line 10-column 10, line 62).

Regarding *claim 17*, Tonkin discloses the method discussed above in claim 14, and further teaches that the at least one network service is implemented, at least in part, by at least one proxy server that serves as a proxy for at least one printer (document production locations 71-73, see Fig. 1, column 8, line 10-column 10, line 62).

Regarding *claim 18*, Tonkin discloses a method comprising receiving, via at least one Web service, a user selection of imaging data that is to be used to build a booklet (see Fig. 5A, column 6, line 64-column 7, line 27), receiving, via the at least one Web service, user input for incorporating the imaging data into the booklet (see Figs. 5A-5F, column 7, line 11-column 8, line 67), and building, via the at least one Web service, a booklet incorporating imaging data received from the user input (see Figs. 8A-9, column 12, line 23-column 13, line 24).

Regarding *claim 19*, Tonkin discloses the method discussed above in claim 18, and further teaches of providing the user, via the at least one Web service, options to print the booklet on at least one Web-accessible printer and saving the booklet in a Web-accessible location (column 9, line 5-column 10, line 62).

Regarding *claim 20*, Tonkin discloses the method discussed above in claim 18, and further teaches that the at least one Web service is implemented, at least in part, by at a Web-accessible printer (document production locations 71-73, see Fig. 1, column 8, line 10-column 10, line 62).

Regarding *claim 21*, Tonkin discloses the method discussed above in claim 18, and further teaches that the at least one Web service is implemented, at least in part, by at least one proxy server that serves as a proxy for at least one printer (document production locations 71-73, see Fig. 1, column 8, line 10-column 10, line 62).

Regarding *claim 22*, Tonkin discloses one or more computer-readable media having stored thereon computer readable instructions which, when executed by one or more processors (column 5, lines 39-52), cause the processors to receive, via at least one Web service, a user selection of imaging data that is to be used to build a booklet (see Fig. 5A, column 6, line 64-column 7, line 27), receive, via the at least one Web service, user input for incorporating the imaging data into the booklet (see Figs. 5A-5F, column 7, line 11-column 8, line 67), and build, via the at least one Web service, a booklet incorporating imaging data received from the user input (see Figs. 8A-9, column 12, line 23-column 13, line 24).

Regarding *claim 23*, Tonkin discloses a booklet-making method comprising browsing to a Web-accessible booklet-making service (column 5, line 53-column 6, line 50), specifying to the Web-accessible booklet-making service imaging data that is to be used to make a booklet and how that imaging data is to be used (see Figs. 5A-5F, column 7, line 11-column 8, line 67), and constructing, via the Web-accessible booklet-making service, a booklet incorporating the image data (see Figs. 8A-9, column 12, line 23-column 13, line 24).

Regarding **claim 24**, Tonkin discloses the method discussed above in claim 23, and further teaches of printing the booklet via the Web-accessible booklet-making service (column 3, line 41-column 4, line 24, and column 5, line 53-column 6, line 50).

Regarding **claim 25**, Tonkin discloses a web service comprising means, operably associated with the Web, for enabling a user to specify one or more Web-accessible documents for use in building a booklet (see Fig. 5A, column 6, line 64-column 7, line 27), means, operably associated with the Web, for enabling the user to specify one or more pages from the one or more documents and where the one or more pages will reside in the booklet (see Figs. 5A-5F, column 7, line 11-column 8, line 67), and means, operably associated with the Web, for building the booklet (see Figs. 8A-9, column 12, line 23-column 13, line 24).

Regarding **claim 26**, Tonkin discloses the web service discussed above in claim 25, and further teaches of means for printing the booklet (column 3, line 41-column 4, line 24, and column 5, line 53-column 6, line 50).

Regarding **claim 27**, Tonkin discloses the web service discussed above in claim 25, and further teaches of means for saving the booklet in a personal imaging repository associated with the user (column 4, line 63-column 5, line 6, and column 8, lines 61-67, as seen in Figs. 5A-5F, wherein the filename is "Robert Tonkin/...", and in Figs. 8A-8E, wherein the filename is "Tree Branch/Eric Cartman").

Citation of Pertinent Prior Art

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Gottfreid (U.S. Patent Number 6,076,076) discloses an Internet printing service.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joe Pokrzywa whose telephone number is (571) 272-7410. The examiner can normally be reached on Monday-Friday, 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L. Coles can be reached on (571) 272-7402. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
